

Introduction to Geographic Information Science

Lab 03

Christopher G. Prener, Ph.D.

Spring, 2016

Directions

If you have not already done-so, please download the resources .zip file from Blackboard for Mitchell (2010).

Beginning on the middle of page 49, work your way through Mitchell's examples up until the beginning of section 3.8.

On page 49 in particular, use the `id` variable instead of the `studentid` variable in the files `survey1.dta` and `survey2.dta`.

As you make your way through the commands, copy the working, complete commands in a do-file. Once finished, send this do-file to me via email. Please do so before 4:20pm on Wednesday, February 3rd.
